

中国国际新能源汽车技术 零部件及服务展览会

CHINA'S INTERNATIONAL NEW ENERGY VEHICLE
TECHNOLOGY, PARTS AND SERVICES EXHIBITION

招展函

EXHIBITOR'S GUIDE

从设计到制造

从使用到服务的全产业链展会

EXHIBITION OF THE ENTIRE INDUSTRY CHAIN FROM DESIGN TO
MANUFACTURING, FROM USE TO SERVICE

2025年2月21-24日

北京新国展二期

Beijing New National Exhibition II

主办单位
ORGANIZER

中国设备管理协会
新能源汽车产业发展促进中心

YASN 雅燕国际

China Equipment Management
Association new energy
automobile industry development
promotion center

新能源汽车全产业链

趋势、技术、产品——助力造车

NEW ENERGY VEHICLE INDUSTRY CHAIN

TRENDS, TECHNOLOGIES, PRODUCTS - HELP TO BUILD CARS

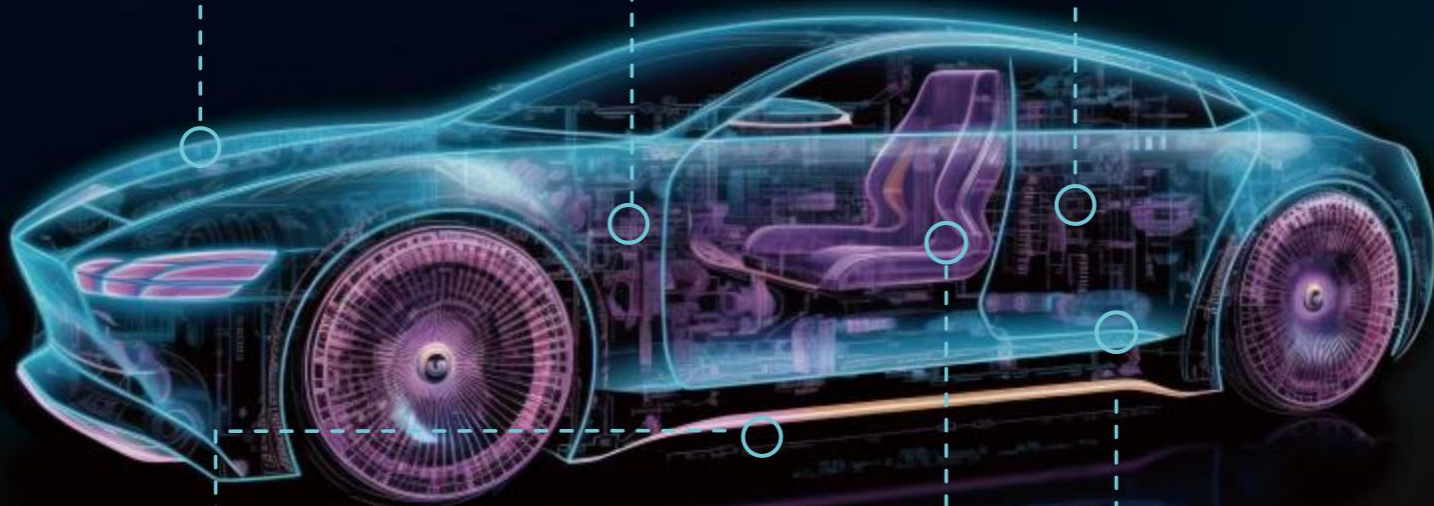

**AUTOMATIC
DRIVING**

**INTELLIGENT
NETWORKING**

**MOTOR/ELECTRONIC
CONTROL**

**CHASSIS
SYSTEM**

**INTELLIGENT
COCKPIT**

**POWER
BATTERY**

14大板块供应链共筑生态

14 MAJOR SUPPLY CHAINS BUILD ECOLOGY

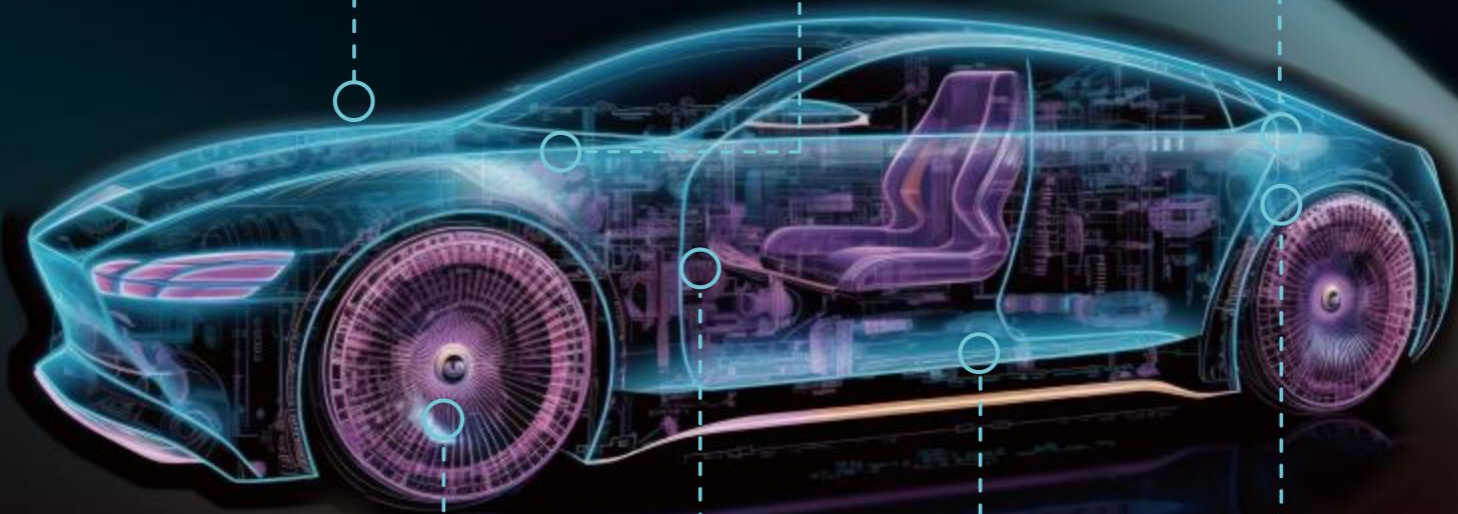

LIGHTWEIGHT/SMART
MANUFACTURING

AIR CONDITIONING

CHARGING AND
REPLACING EQUIPMENT

BRAKE
SYSTEM

PRIMARY THREE
ELECTRONICS

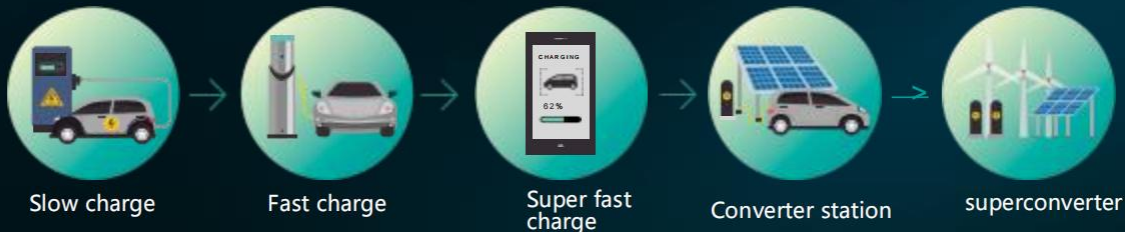

NEW ENERGY
VEHICLES SPECIAL
AFTERLOADING

HYDROGEN
FUEL CELL

电池系统、充换电

BATTERY SYSTEM, CHARGE AND CHANGE TROLLEY HEART, EFFICIENT REPLENISHMENT

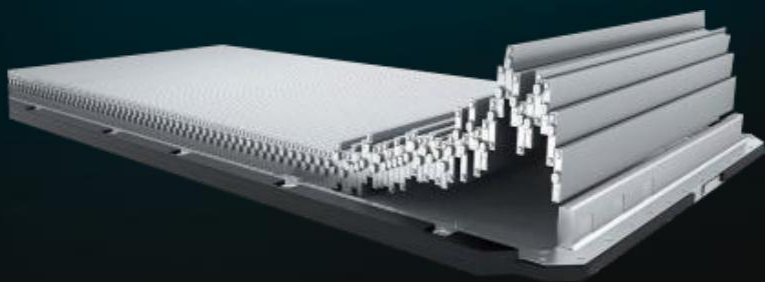

Battery technology iteration route

Liquid battery: Ningde Times, BYD, Yiwei lithium energy, etc

Semi-solid state battery: Ningde Times, Zhiji, Hao Bao, Tailan New energy

Solid state battery: Ningde Times, Guoxen High-tech, Honeycomb energy, etc

International giant layout Solid-state lithium battery

Hydrogen fuel cells: High performance drives a clean future

Range of exhibits

Power battery, power battery PACK assembly line, power battery test system, BMS Battery Management System, Battery thermal management system, Waste battery recycling and processing equipment, energy storage battery; Charging devices and facilities: charging pile, charging machine, distribution cabinet, charging battery and battery management system, parking lot charging facilities, intelligent monitoring, charging station power supply solution, charging station smart grid solution.

Power change facility

Safety device: safety gate, signal light, warning light, guardrail, protective column;
Automotive positioning system: guide slope, deceleration sensor belt, position sensor, ultrasonic sensor, driving device;
Electric changing device: roller, car seat, lifting machine, electric lifting platform, battery and unlocking mechanism;
Charging rack: battery storage module, takeoff and landing module;
Basic parts: base, power change interface, transmission mechanism, battery storage rack, quick power change connector, liquid cooled connector;
Raw materials for battery manufacturing: positive electrode materials, negative electrode materials, electrolyte, etc.

Concurrent activity

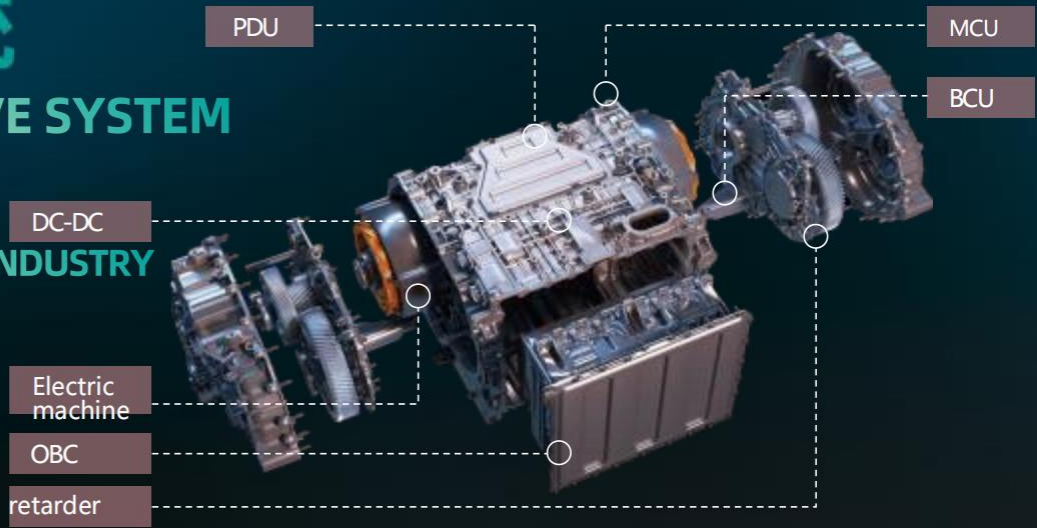

- New energy vehicle power battery and supply chain Technology Development Forum New energy vehicle charging pile and power change technology sub-forum

电驱系统

ELECTRIC DRIVE SYSTEM

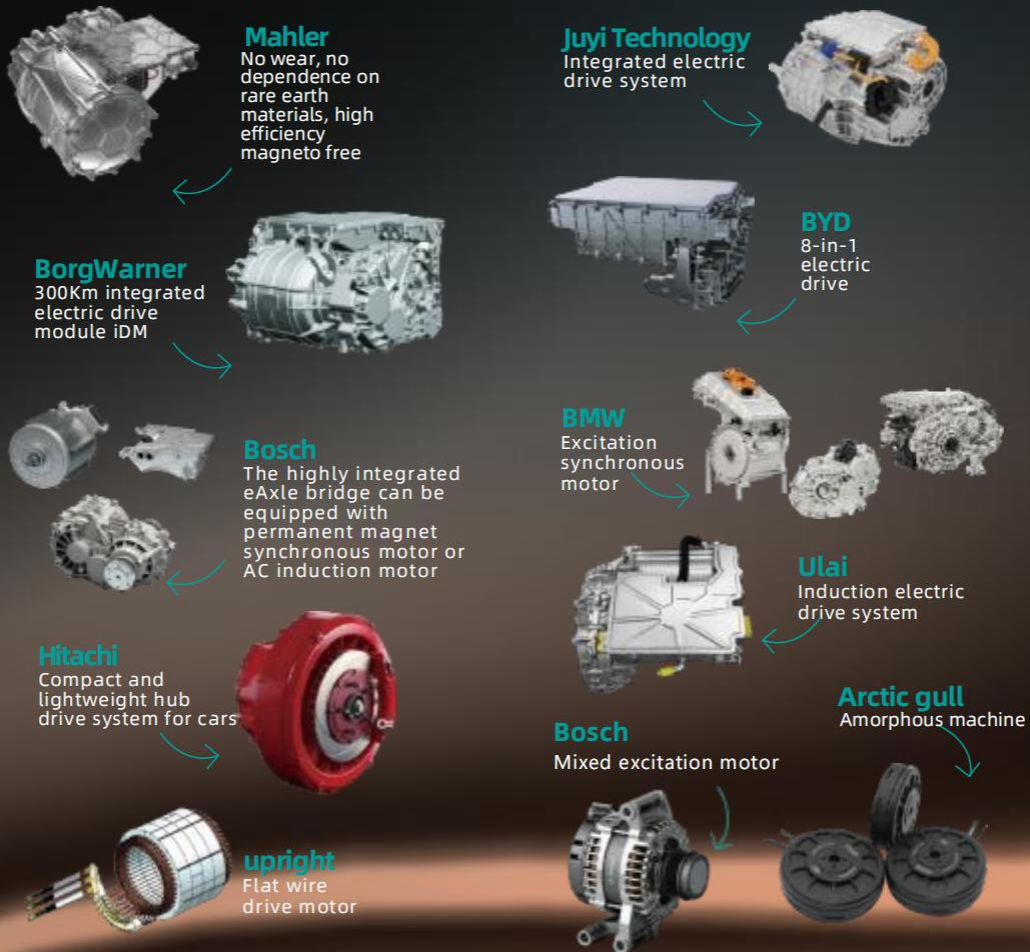

DEEP HERITAGE OF TRADITIONAL MANUFACTURING INDUSTRY

AND TECHNOLOGY PRECIPITATION TO LEAD AND PROMOTE THE RAPID PROGRESS OF MOTOR TECHNOLOGY

Motor iteration = trolley iteration

Single motor → Double motor → four-motor → Wheel motor → Hub motor

Range of exhibits

Electric vehicle DC motor, AC asynchronous motor, permanent magnet motor, switched reluctance motor and materials, winding machine, bearing, fixed rotor, brush, commutator, mold, fan, iron core, Rotating shaft, punching, end cover, punching machine, forging equipment, motor mold, insulation coating equipment, real air executive, die fixture, etc.

Concurrent activity

- New energy vehicle power system technology Development Forum

电控系统

ELECTRONIC CONTROL SYSTEM TRAM TECHNOLOGY FOR MOUNT EVEREST CONTROLLER AREA NETWORK VEHICLE CONTROL UNIT, VCU

MOTOR CONTROL UNIT, MCU

Bosch vehicle controller

NXP Motor controller

Electronic control system layout company

Battery management system layout company

Concurrent activity

- Electronic control and powertrain technology Forum for new energy vehicles
- New energy vehicles three power core technology Forum

Range of exhibits

Vehicle controller VCU, drive motor controller, inverter, frequency converter, reducer, governor, switchgear, electronic shift operating device, feedback sensor, accelerator pedal, cooling system, power module, central control module, signal detection module, soft start module, protection module, heat dissipation system, testing and monitoring protection instruments; High voltage plug, main control board, drive board, IGBT module, current sensor, bus capacitor, low voltage harness, etc. Signal line, CAN line, high voltage wire, power electronic device.

自动驾驶、智能座舱、 智能网联、车规级芯片

**AUTONOMOUS DRIVING,
INTELLIGENT COCKPIT INTELLIGENT
NETWORK CONNECTION, CAR GAUGE LEVEL CHIP**
Software defines the future of smart connectivity in cars

Range of exhibits

Smart seats, ADAS Advanced Driver assistance system, digital intelligent cockpit, automotive safety electronics, virtual intelligent cockpit solutions, automotive audio and video entertainment systems, cockpit controllers, body controllers, chips, sensors, full LCD instruments, intelligent display HUD, streaming mirrors, full vehicle viewing system CRS, intelligent car light/lighting system, central control screen and central control vehicle information terminal, automotive interior innovation technology, other intelligent cockpit application products; Driver assistance Systems, algorithms, processors/microcontrollers, power rates, ASics, LiDAR, millimeter-wave radar, AI, Deep learning, path planning and decision making, night vision systems, network communications, intelligent road infrastructure, intelligent traffic control systems, TSP services.

Concurrent activity

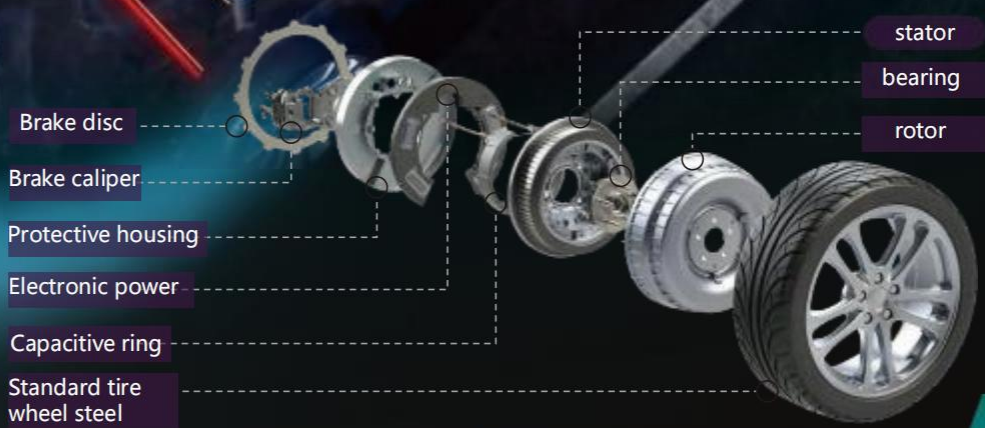

- Autonomous driving and Intelligent Cockpit Technology Innovation Forum
- Automotive Chip and Semiconductor Technology Application Forum
- New energy intelligent network technology Innovation Forum

底盘系统

CHASSIS SYSTEM

Hundreds of billions of blue seas compete with each other

When hub motors became commercially available, brakes no longer existed alone

Range of exhibits

Electric power steering, steering domain controller, control arm, steering knuckle, shock absorber, front and rear stabilizer bar, power supply system; Electronic hydraulic brake, electronic mechanical brake, brake pedal, vacuum booster, brake master cylinder, brake wheel cylinder; Air spring, air supply unit, electronic shock absorber, damping control solenoid valve.

Concurrent activity

- New energy vehicle intelligent chassis technology Forum
- New energy vehicle wire control and wire steering technology Forum

Line control valve

Wire shift

Drive-by-wire suspension

steering-by-wire

Line control motion

轻量化、智能制造 零部件、空调系统

LIGHTWEIGHT BODY STRUCTURE, NEW MATERIAL PARTS
LIGHTWEIGHT, INTELLIGENT MANUFACTURING SPARE
PARTS, AIR CONDITIONING SYSTEM
Double carbon piloting the smart future

Lightweight body structure low carbon components

Heat pump air conditioning system solutions:

Inert gas + cold water circulation air conditioning

Range of exhibits

Parts, high strength fasteners, high performance composite materials, body structure design, laser welding, hot stamping and cold pressing technology, flexible intelligent whole line, integrated pressure casting, ultrasonic system, painting integration, ultrasonic spraying coating equipment, air conditioning compressor, PTC heater, condenser, evaporator, radiator, temperature controller, fan, electronic fan, filter, thermal expansion valve, air conditioning pipeline, air conditioning motor, air conditioning bearing, belt, switch, clutch, connector, high and low pressure valve, solenoid valve, reversing valve, radiator, water tank, seal, liquid storage tank, refrigerant, refrigerant.

Concurrent activity

- Automotive air conditioning and thermal management technology sub-forum
- Automotive lightweight body structure design technology sub-forum
- New energy vehicle intelligent manufacturing and application Technology Forum

新能源汽车专用后装生态

COMPETITION'S OVER. TRAM'S NEW TRACK

Special afterloading ecology for new energy vehicles

Range of exhibits

Diagnostic and testing equipment: OBD (on-board Diagnostic System) scanning tool: used to read and clear the fault code, monitor the performance parameters of the vehicle; Battery detection system: detect battery health status, voltage, internal resistance, etc. Multifunctional tester: used to test the performance of motor, controller and other key components; Network communication detection equipment: used to diagnose and monitor the vehicle's communication network, such as the CAN bus analyzer. Battery repair Tools and equipment: Battery removal tool: special tool for safely removing the battery pack; Battery charging device: including fast charger and intelligent charge management system; Battery balance instrument: used for battery balanced charge and discharge, extend battery life; Waste battery recycling processing equipment and technology. Drive and motor service tools and equipment: Motor disassembly and installation tools: dedicated to motor maintenance and replacement; Motor winding/bearing repair tool;

Motor performance test bench: detect and calibrate motor performance and efficiency; Cooling system repair tools and supplies. Coolant replacement tool: special equipment for quick replacement of coolant; Coolant system Detector: detects the pressure and flow of the cooling system to ensure the normal operation of the system. Safety equipment: Protect maintenance personnel from electric shock and chemical damage, including insulating gloves/shoes/clothes/hats, goggles, insulating rubber pads, insulating tools, first aid equipment, etc. Upgrade Modified camping equipment, special foot mat modification, new energy vehicle interior modification, electric tail installation/modification, audio modification, etc.

Concurrent activity

- New energy vehicle maintenance contest
- New energy vehicle maintenance technology lecture

供应链自己的主场

高效谈合作，共同建生态

THE SUPPLY CHAIN'S OWN HOME FIELD IS EFFICIENT TO TALK ABOUT COOPERATION AND BUILD ECOLOGY TOGETHER

The first new energy vehicle maintenance skills competition

Activity form: New energy vehicle maintenance professional event jointly participated by colleges and universities, modification factories, maintenance stores, 4S stores. (intended)

Time: February 21-24, 2025

Participants: new energy vehicle repair stores, auto repair schools, 4S stores

International supply chain exhibitor procurement meeting

Activity form: International procurement exchange meeting with the participation of Embassies in China, international exhibitors, domestic exhibitors, etc., to build an international ecosystem (proposed)

Event time: Meeting area of the Exhibition Hall in the afternoon of February 22, 2025

Participants: Embassy in China, automobile companies, international exhibitors, domestic exhibitors

China International new energy vehicle supply chain industry top ten awards

Activity form: This activity aims to establish corporate image, expand visibility, enhance corporate responsibility, lead the industry innovation and development, enhance the industry brand awareness, and promote the leading enterprises that have made significant contributions to the development of China's new energy vehicle industry in 2024)

Event time: February 22, 2025, New National Exhibition venue

Supply chain sector Summit technology Innovation Forum

Form of activity: 12 sections will be conducted separately, with the participation of domestic leading supply chain enterprises to discuss technical difficulties and industry development together, and promote industrial development (proposed)

Event time: February 22, 2025 Intelligent network multi-functional conference room

Participants: Major three power, automatic driving, intelligent cabin, chip and other sectors of exhibitors

行业圈的一席之地

A PLACE IN THE INDUSTRY CIRCLE

中国国际新能源汽车技术、零部件及服务展览会

CHINA'S INTERNATIONAL NEW ENERGY VEHICLE TECHNOLOGY, PARTS AND SERVICES EXHIBITION

2025 Exhibition area distribution map

BRAND EXHIBITION SHOW COOPERATION

Show the effect drawing, according to the enterprise situation can be fine-tuned

For detailed cooperation mode please contact Brand Cooperation Department

Contact: Luo Linlin 17801089540

Special light

Variable space, self-creation and self-matching

Price:

980 yuan /m²

Requirements: From 36m², booth set up by oneself

Luxury brand standard booth

Digital 4 meters high luxury booth, the only one in the industry

Price:

Single space, 8800 yuan/per (9m²)

Double space, 10800 yuan/piece (9m²)

Materials included:

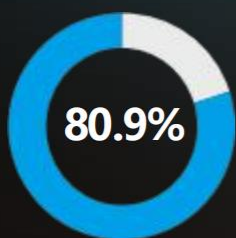

Corporate Reception desk (1)

Business Negotiation Table (1 set)

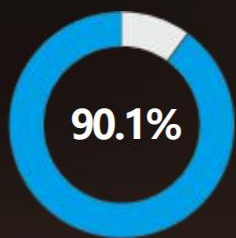

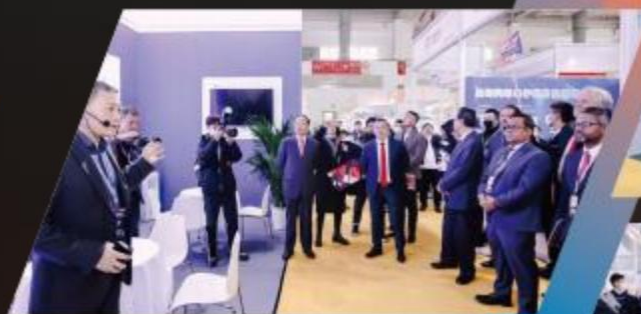

Booth spotlights (1 set)

上届精彩回顾

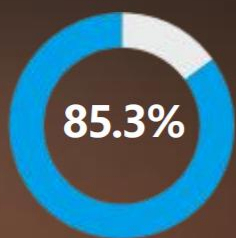

LAST WONDERFULL REVIEW

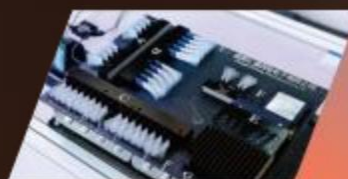

Expressed willingness to continue to participate in the CINEVE exhibition

Willing to recommend CINEVE to peers and industry partners

We are satisfied with the overall effect of the 2024 exhibition

品牌、渠道、新品

BRAND, CHANNEL, NEW PRODUCTS

Class of 2024 participating groups

62 car companies

284 supply chain companies

65 listed companies

197 mainstream manufacturing
companies

13 heads of automotive head
design companies

媒体联盟 MEDIA ALLIANCE

以上合作单位排名不分先后且不止于此.....
